

cysteine-type peptidase activity, GO:0008234

- negative regulation of NF-kappaB transcription factor activity, GO:0032088
- aminopeptidase activity, GO:0004177
- regulation of extrinsic apoptotic signaling pathway via death domain receptors, GO:1902041
- polysaccharide binding, GO:0030247
- CARD domain binding, GO:0050700
- IRES-dependent viral translational initiation, GO:0075522
- SAGA-type complex, GO:0070461
- protein desumoylation, GO:0016926
- eukaryotic translation initiation factor 3 complex, GO:0071541
- SUMO-specific protease activity, GO:0016929
- GPI-anchor transamidase complex, GO:0042765
- GPI-anchor transamidase activity, GO:0003923
- attachment of GPI anchor to protein, GO:0016255
