

mRNA binding involved in posttranscriptional gene silencing, GO:1903231 

- positive regulation of erythrocyte differentiation, GO:0045648
- negative regulation of adenylate cyclase activity, GO:0007194
- negative regulation of epithelial to mesenchymal transition, GO:0010719
- regulation of ventricular cardiac muscle cell membrane repolarization, GO:0060307
