

homophilic cell adhesion via plasma membrane adhesion molecules, GO:0007156

- virus receptor activity, GO:0001618
- semaphorin-plexin signaling pathway, GO:0071526
- calcium-dependent cell-cell adhesion via plasma membrane cell adhesion molecules, GO:0016339
- hair follicle development, GO:0001942
- retina layer formation, GO:0010842
- lens morphogenesis in camera-type eye, GO:0002089
- positive regulation of potassium ion transmembrane transport, GO:1901381
- nephron development, GO:0072006
- semaphorin receptor activity, GO:0017154
- cell recognition, GO:0008037
- photoreceptor cell maintenance, GO:0045494
- axonal fasciculation, GO:0007413
- cornification, GO:0070268
- neuron cell-cell adhesion, GO:0007158
- keratinocyte proliferation, GO:0043616
- planar cell polarity pathway involved in neural tube closure, GO:0090179
- mitral valve morphogenesis, GO:0003183
