

**cysteine-type peptidase activity, GO:0008234**

- thiol-dependent ubiquitin-specific protease activity, GO:0004843
- thiol-dependent ubiquitinyl hydrolase activity, GO:0036459
- negative regulation of NF-kappaB transcription factor activity, GO:0032088
- antigen processing and presentation, GO:0019882
- protein K48-linked deubiquitination, GO:0071108
- protein K63-linked deubiquitination, GO:0070536
- aminopeptidase activity, GO:0004177
- contractile ring, GO:0070938
- protein desumoylation, GO:0016926
- SUMO-specific protease activity, GO:0016929
- decidualization, GO:0046697
- regulation of extrinsic apoptotic signaling pathway via death domain receptors, GO:1902041
- response to muramyl dipeptide, GO:0032495
- carboxypeptidase activity, GO:0004180
- self proteolysis, GO:0097264
- myofibril assembly, GO:0030239
- negative regulation of retrograde protein transport, GO:1904153
